National suggestions to the next Joint Operation

- Should be multi purpose operation again - involving the Canal
- More increased control on illegal labour employment (exploitation)
- Tasks and methodology should be chosen by the countries again
- We should improve the run of the Temporary Coordination Centre in Mohács make the information flow more effective - with one more HU staff (at least 2 - from which 1 should be analyser)
- Framework Operational Plan was appropriate
- Data exchange form should be divided into 2 parts (1st: only numbers - easy to summarize in excel, 2nd part: independent word sheet - with case descriptions..)
- Quicker information flow, forwarding the daily operational results in 2 hours
