National suggestions to the next Joint Operation

Organization of the 2nd joint operation in July

No remarks.

What kind of tasks and methodology should be carried out during the 2nd operation

Tasks: controls on – illegal migration, excisable goods, leisure vessels, dangerous goods, fishing offences, passenger ships.

Methodology: patrolling by duty boats and cars, “On the spot” checks in border ports, surveillance, prevention, counteraction, risk analysis.

How could we improve the run of the Temporary Coordination Centre in Mohács and make the information flow more effective

Better wi-fi connection.

How could we improve the Framework Operational Plan and its annexes – especially the Data exchange form

The Data exchange form is flexible enough.
